

TY.B.Tech (CSE)-Div A, B and C
AY: 2024-25
Area/Domain and Sub Domain for mini project allocation

Sr.No	Area/Domain	Sub-Domain
1	Artificial Intelligence, Machine Learning, Deep Learning	Predictive Analysis using Machine Learning
		Analytical and predictive Model building Machine learning
		Object Detection using deep learning
		Image classification using deep learning
		Applications of AI/ML in Agriculture Field
		Medical diagnosis using machine learning
		Disease detection using Machine Learning
		Image classification and segmentation using Machine Learning
		Classification & Prediction using Machine learning in Health Sector
		Smart Automation using AI & IoT
		Prediction model using Machine Learning
		AI based systems in agriculture
		Medical diagnostics using AI and Deep learning
		Prediction using machine learning
		Recommendation system using machine learning
		Predictive Analysis using Deep Learning
		Collaborative Filtering Recommendation Techniques
		Application Development using Generative AI
		Reinforcement Learning
		Medical Diagnosis using Machine Learning
		AI/ML in Agriculture
		Classification & Prediction using Machine learning
		Applications of AI for building Chatbot Applications.
2	Data Science	Predictive Analysis using Data science
		Analysis of Data in Healthcare applications
		Feature prediction using Feature Engineering
		Data Analysis using data mining
		Data optimization in DBMS
		Data Science for Sustainable Development
		Analysis and Decision making using Data Science
3	Internet of Things, Computer Hardware	IoT applications for smart home/smart city
		IoT applications for agriculture
		IoT applications for safety
		Vehicle Safety Management System Using IoT
		IoT Applications
4	Cloud Computing	Data processing using Cloud Services
		Security services in cloud

		Cloud Services
		Cloud Computing
5	Computer Network and Network Security	Distributed databases
		Data Analysis & Processing in Distributed System.
6	Cyber Security and Block Chain	Smart contracts in Block Chain
		Identity threat detection in information security
		Supply Chain Management using Block Chain
		Develop Decentralized Application using Ethereum
		Data Security using Block Chain Technology
		Cyber fraud
7	Augmented Reality, Virtual Reality	AR,VR in Aviation Industry
		3D Technology using AR,VR
8	Web Technology Devops	Web services using web technology
		Web scrapping application development
		Web application based on Full Stack
		Web Application Development with Django Framework
		Web application based Development
9	Business Intelligence , Data Analytics and Data Mining	Predictive Data Analytics
		Business Analytics-Predictive Data Analytics Models
		Data Analytics in Medical
		Data Analysis & EDA ,Data Visualization & building BI Dashboards.
		Bigdata Analytics for Medical Diagnostics
		Educational Data Mining
10	Image Processing	Interactive Media Studies & Image Processing
11	Mobile Application Development	Mobile Application development for any client requirement
		ERP model using Mobile Application Development
		Mobile Application Development

Mention three different domains from above table and you should not choose more than one sub-domain from the same domain in your preference

Preference	Right way of giving preference, since all are from different domain	Wrong way of giving preference, since preference 1 and 2 are from Data Science domain
First	Predictive Analysis using Machine Learning	Predictive Analysis using Data Science
Second	IoT applications for smart home/smart city	Analysis and Decision making using Data Science
Third	Smart contracts in Block chain	Analytical and predictive Model building using Machine Learning

Link: <https://forms.gle/ZwY1HwpuDSh1Qtqw9>

Fill the above link on or before 10/01/2025

Note :

1. Only team leader will fill the above link.
2. There will be panel for project guide allocation.
3. Each group will give their preference for area of interest.
4. Guides will be allocated as per his/her area/domain preferences.
5. A group should be of 4 students of same division.
6. Project group will be allocated to guide as per the area of interest and availability of guide.
